Did you know that rats laugh when they're tickled?

Scientists have found that when rats are happy or excited, they make a very high-pitched squeaks (too high for us to hear), which is rat 'laughter'.

What does your favorite animal look like? Draw a picture of them here!

Help the calf get back to his mother.

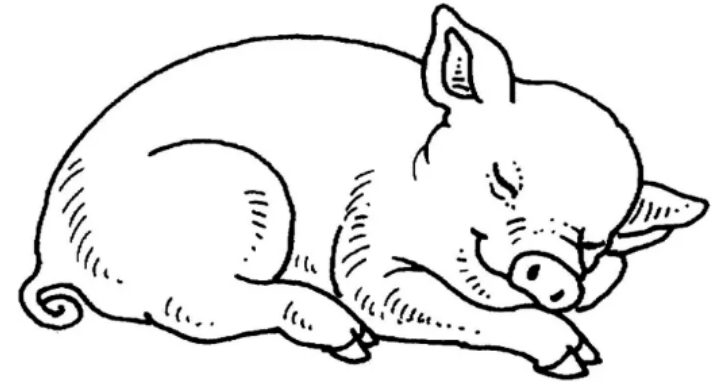

DID YOU KNOW?

Cows have no upper front teeth. Therefore, when they're eating food, they press their sharp bottom teeth against the top hard palate of their mouth to cut blades of grass.

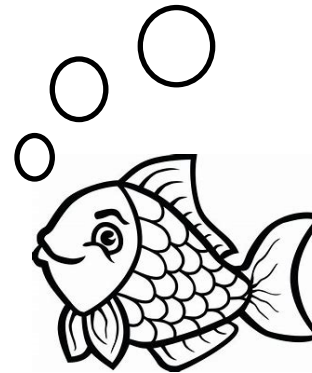

DID YOU KNOW?

Newborn piglets recognize their own names and even learn to run to their mother's voices. This is because the mother's sing to their young while they are still nursing.
